With efficient cross-browser testing and 70% faster test execution, LambdaTest helped us achieve faster time-to-market and enhanced CX. Their support and cost-effectiveness exceeded our expectations”

Daniel de Bruijn

Quality Assurance Automation Engineer

Transavia

Introduction

Transavia began searching for improved test execution platforms available in the market. They assessed various solutions based on their performance, available features, customer support, and pricing. While evaluating LambdaTest along with two other options, LambdaTest emerged as the leading choice. They were pleased with the support they received during the demo sessions and found that LambdaTest offered a broader range of features at a competitive price.

About Transavia

Transavia is a Dutch low-cost airline that operates flights within Europe and to popular vacation destinations. It is a subsidiary of Air France-KLM, and Amsterdam Airport Schiphol serves as its primary hub. Transavia Airlines focuses on giving its passengers a comfortable and delightful travel experience while also offering affordable pricing.

At a glance

Industry :

Transport and Logistics

Challenge :

With their previous test execution platform shut down, lacking updates and customer support, Transavia sought alternative options to meet their testing requirements and access more advanced features.

Product : [Test Analytics | Cross Browser Testing](#) ↗

Key Highlights :

LambdaTest enabled Transavia to achieve testing goals with cost-effective solutions, enhancing the testing process, reducing infrastructure expenses, and boosting customer satisfaction.

Navigating The Testing Hurdles: Transavia's Quest For Advanced Test Execution Platforms

To meet their testing requirements, Transavia relied on a test execution platform. However, the platform was no longer updated as it was shut down. It was an out-of-the-box solution with no customer support whatsoever. This prompted Transavia to explore alternative options that would better support their testing needs and offer more advanced features.

- **Quality Assurance of transavia.com:** Ensuring the website's quality and performance required comprehensive testing, including regression testing, smoke testing, and integration testing.
- **Limited Features:** The previous platform was an out-of-the-box solution with limited capabilities, prompting the need for a more advanced testing solution.
- **Discontinued Test Execution Platform:** The existing platform used by the team was no longer updated and had been shut down, leaving them without customer support or updates.
- **Seeking Alternative Options:** Transavia needed to explore alternative test execution platforms that could better cater to their testing requirements and offer more robust features and support.

LambdaTest Helping Transavia With Seamless Testing And Unmatched Support

While evaluating LambdaTest along with two other options, LambdaTest emerged as the leading choice for Transavia. They were pleased with the support they received during the demo sessions and found that LambdaTest offered a broader range of features at a competitive price.

Efficient Cross Browser Testing: Transavia achieves seamless cross-browser testing with LambdaTest, ensuring compatibility across 3000+ desktop and mobile browsers, catering to a diverse audience for a smooth user experience.

Faster Test Execution: With LambdaTest, Transavia experiences a remarkable 70% faster test execution, maintaining consistency in microsites with a library for actions like clicks and scrolls, while leveraging the capability generator tool for Selenium.

Enhanced Test Reporting and Analytics: Transavia leverages LambdaTest's Test Analytics Dashboard for comprehensive reports and insights, optimizing testing processes, bug fixing, and informed decision-making.

Improved Customer Support and Cost Effectiveness: Transavia benefits from improved customer support and cost-effectiveness with LambdaTest, thanks to competitive pricing, extensive features, and prompt assistance throughout the trial and beyond.

“

LambdaTest is creating that next level of efficiency around test automation so that people can actually focus on testing versus test orchestration.”

Satya Nadella, CEO, Microsoft,

Elevating Testing Efficiency With LambdaTest Real Devices Cloud

Being able to realize multiple benefits in their testing process, Transavia takes its customer relationship forward with LambdaTest by using the Real Devices Cloud.

LambdaTest's Real Device Cloud is a comprehensive solution that enables teams to perform efficient and reliable cross-browser and cross-device testing.

With a vast collection of real devices, including smartphones, tablets, and desktops, teams can seamlessly test their web and mobile applications on various platforms and configurations. It offers instant access to devices, eliminates the need for physical infrastructure, and provides scalable testing capabilities.

About LambdaTest

LambdaTest is a continuous quality testing cloud platform that helps developers and testers ship code faster. Over 10,000+ customers, and 2 million+ users across 130+ countries rely on LambdaTest for their testing needs.
